Sub – Request for urgent resolution of issues in the Inventory Module of the E-Sushrut Portal

Sir,

With reference to the subject mentioned above, the following issues have been observed in the Inventory Module of the E-Sushrut Portal (<https://igimspatna.prd.dcservices.in>), which need to be addressed on an urgent basis

1. Stock Discrepancies:

- As per the generated invoices, the corresponding stock quantities are not reflected in the ledger and stock reports, resulting in mismatched records.
- Stock discrepancies in many medicines, as discussed earlier, remain unresolved (e.g., CAPECITABINE TAB 500MG 1X10 (BMSICL), TRAMADOL SUSTAINED TAB 50MG (BMSICL), SURGICAL GLOVES NO 6.5 (1 PAIR) BMSICL, SURGICAL GLOVES NO 7 (1 PAIR) BMSICL, DISPO 5ML (BMSICL), etc.).

2. Financial Transactions:

- The cost of medicines and surgical items purchased from outside suppliers for Ayushman Bharat Patinets is being displayed under the category "Pharmacy" in the Final Patient Bill Summary.
- The amount shown in the invoices generated based on issued quantities is inaccurate, and in some cases, the medicine cost is not being deducted from the patient's ledger account (e.g., COLISTIMETHATE INJ. IMIU (PROMISTIN)).
- A report is required to highlight variations in Landing Price, MRP, and Sale Rate of drugs utilized during a particular year/session, along with the percentage of concession/benefit extended to patients by the Central Drug Store, IGIMS Patna.
- A comprehensive patient-wise and drug-wise sale report is required from the inception of the E-Sushrut Portal. This is essential for accurate data reconciliation, covering both the quantity and value of drugs entered in the system and the corresponding details of medicine distribution.
- A patient-wise sale report for the medicines billed against the Tariff 98-99.

3. Indent Issues:

- The demand for surgical items is being raised under the Drug Category, for which ledgers have not been created by the Central Drug Store.
- At present, indents for medicines are being received through multiple desks (e.g., IPD Issue to Patient Online and Issue Desk), causing duplication and confusion in workflow management.

A list of suggested improvements to align the workflow of the Inventory Module with current operational requirements is enclosed herewith. It is therefore requested that the above-mentioned issues, discrepancies, and suggested improvements be resolved on a priority basis in the interest of patient care and audit compliance.

Thank you for your kind cooperation and prompt attention to this matter.
